

Instructions

Comeng Brake Simulator

System Requirements

- Operating Systems: Windows / Mac OSX / Linux
- Web browser with [Flash](#) installed
- Desktop or Laptop only (Some tablets/phones browsers might allow Flash to be installed)
- Administrator privileges if using Standalone version

The easiest way to run the simulator is the Online version. The online version requires [Flash](#) installed on your web browser. If Flash isn't installed, it will ask you to install it. If you can't install Flash or don't want it installed, then try the standalone versions. The standalone version requires administration privileges to run. Standalone versions for Windows or Mac OSX only.

Version	Link to use	QR Code	Notes
Online	http://goo.gl/QiCiXu		Requires Adobe Flash
Standalone for Windows or Mac OSX	https://goo.gl/QiBQIK		Download appropriate file for your operating system. Requires Admin Privileges
